

APPLICATION QUESTIONNAIRE VALIDATION

Please supply your name, position, company and contact details

The purpose of this questionnaire is to gather sufficient information to enable SGS to send you a proposal for validation of your project.

All information and documentation provided in association with this application form will be treated confidentially and used solely for the purpose of preparing a technical and financial proposal for the work required.

The following questions below cover the minimum information required for preparation of a proposal. Please complete all questions or alternatively, you may provide SGS with a PIN or a draft PDD covering the same information. If you submit a PIN, please make sure it specifies normal or small scale CDM and which methodology(ies) will be applied.

Section 1 General information:

Name of project	
Is the project "Large-scale" or "Small-scale"?	
Short description of the project and technology used	
Which approved methodology will be used for the baseline and monitoring plan? If a New Methodology is being submitted, please complete Section 4 below.	
Total Estimated CERs:	

Section 2 Travel arrangements:

Please describe the exact location of the project:	
Nearest airport and major city.	
Travel time from nearest airport / major city	
Are there any health & safety training requirements for visiting the site (if yes, please give details)	

Section 3 Timing:

Proposed start date for the Validation exercise ¹	
Proposed start date for the project or the stage of implementation of the project	

Section 4 Submission of a new methodology:

CDM projects are required to use an approved baseline and monitoring methodology. If there is currently no approved methodology that can be used for your project, SGS is authorized to submit a new methodology to the CDM Executive Board. If you require the submission of a new methodology, please complete this section.

Technology applied	
CDM Sectoral Scope covering this project	
Briefly describe baseline and with project scenarios, indicating why the project is additional to business as usual and why it reduces GHG emissions to the atmosphere or increases carbon sequestration:	
Deadline for submission (i.e. which meeting of the Meth Panel):
